

KEVIN JC

ARTIFICIAL INTELLIGENCE AND DATA SCIENCE STUDENT

Chennai, Tamilnadu, India | +91 7708702986 | [Linkedin-Kevin](#) | [Github-Kevin](#) | [Portfolio-Kevin](#)

PROFESSIONAL SUMMARY

Tech enthusiast with a passion for computers and technology, skilled in coding and application development. Completed various machine learning projects, hosted a portfolio website, and regularly practice problem-solving on LeetCode.

EDUCATIONAL PROFILE

University Education, St.Joseph's College Of Engineering-Chennai

Expected 2026

CGPA-8.20

Secondary Education, Madras Christian College Mat.Hr.Sec.School-Chetpet

Graduated 2022

Percentage-88

EXPERIENCE

Hackathons

- **Startup TN -2026**: Developed a learning platform with AI based skill assessment and Job Placement trainer tailored for deaf, mute and blind people; Awarded with a cash prize of Rs.10,000.
- **Enthirathon-2024**: Developed a hand sign-to-voice application using TensorFlow and RandomForestClassifier; awarded "Best Sociality" with a cash prize of Rs. 10,000.
- **AI - No Code Hackathon**: Created an app connecting small and large industries using FlutterFlow and Buildship; finalist in the 24-hour hackathon.
- **PSG iTech-HackFest 2023**: Developed a Smart AI System for HVAC with Raspberry Pi and AdaFruit Dashboard; gained experience in microcontrollers and IoT devices.

Internships

- **Python Programming Intern(Codsoft, Dec 2023 - Jan 2024)**: Developed a To-Do-List GUI, simple calculator, and password generator using Python and PyQt5.
- **Data Science Intern (Technook, Apr 2023 - May 2023)**: Built a GUI countdown timer and a Linear Regression model for predicting Air Quality Index; gained hands-on experience in Data Science and Python.

Projects Done

- **Football-Stride-Rate-Analysis**: Developed a Deep Learning Model that provides insights on Football Matches with its own tracking algorithm.
- **Foodoo**: Developed a Full Stack Website using React and Tailwind integrated with firebase Database and hosting components.
- **Women Safety Analysis**: Developed a software integrated with a Deep Learning that provides valuable insights and safety protocols for Women with a automated alert system.
- **SignBridge**: Developed a AI Assisted Learning for Deaf, Mute and Blind learners, with various accessibility options curated for the young learners.
- **Gesture Speaks**: Developed a machine learning-based application that translates sign language into both voice and text, empowering communication for the hearing and speech impaired.
- **Happy Scales**: Developed a Software for small scale industries to connect with large scale industries improving their scalability and flexibility over a period of time using No Code tools.

CERTIFICATIONS AND ACCOMPLISHMENTS

- **LinkedList Data Structures**: Gained expertise in singly linked lists, doubly linked lists, and circular linked lists, with hands-on coding exercises and problem-solving sessions.
- **Prompt Engineering for ChatGPT (Coursera, Vanderbilt University)**: Specialized in prompt engineering techniques to optimize ChatGPT interactions, focusing on effective prompt design and AI response strategies.
- **Python Programming - From Basics to Advanced (Udemy)**: Mastered Python, including data structures, algorithms, web development, and data analysis, through projects and daily coding challenges.
- **Introduction to Front End Development (Meta, Coursera)**: Learned HTML, CSS, JavaScript, and responsive design, with practical projects enhancing web interface development skills.

PROGRAMMING EXPERTISE AND SKILLS

- **Frontend**: Html,CSS,JavaScript,React.js
- **Frameworks**: TailwindCSS, Flask, FastAPI, Pytorch
- **Backend**: Python, Node.js, Express.js
- **Deployment** : Docker, Github Actions
- **Programming Languages**: Java, Python, C++, C.
- **Expertise**: Machine Learning and Deep Learning
- **Computer Vision**: YOLOv8, Roboflow, Supervision, OpenCV
